

Introduction to Angular

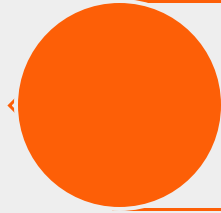

Persistent Interactive | Persistent University

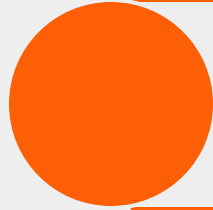

Key Learning Points

- Framework features
- Single Page Applications
- How to get started?
- Software setup required

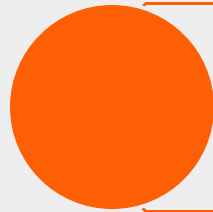

What is Angular?

Framework to build SPA

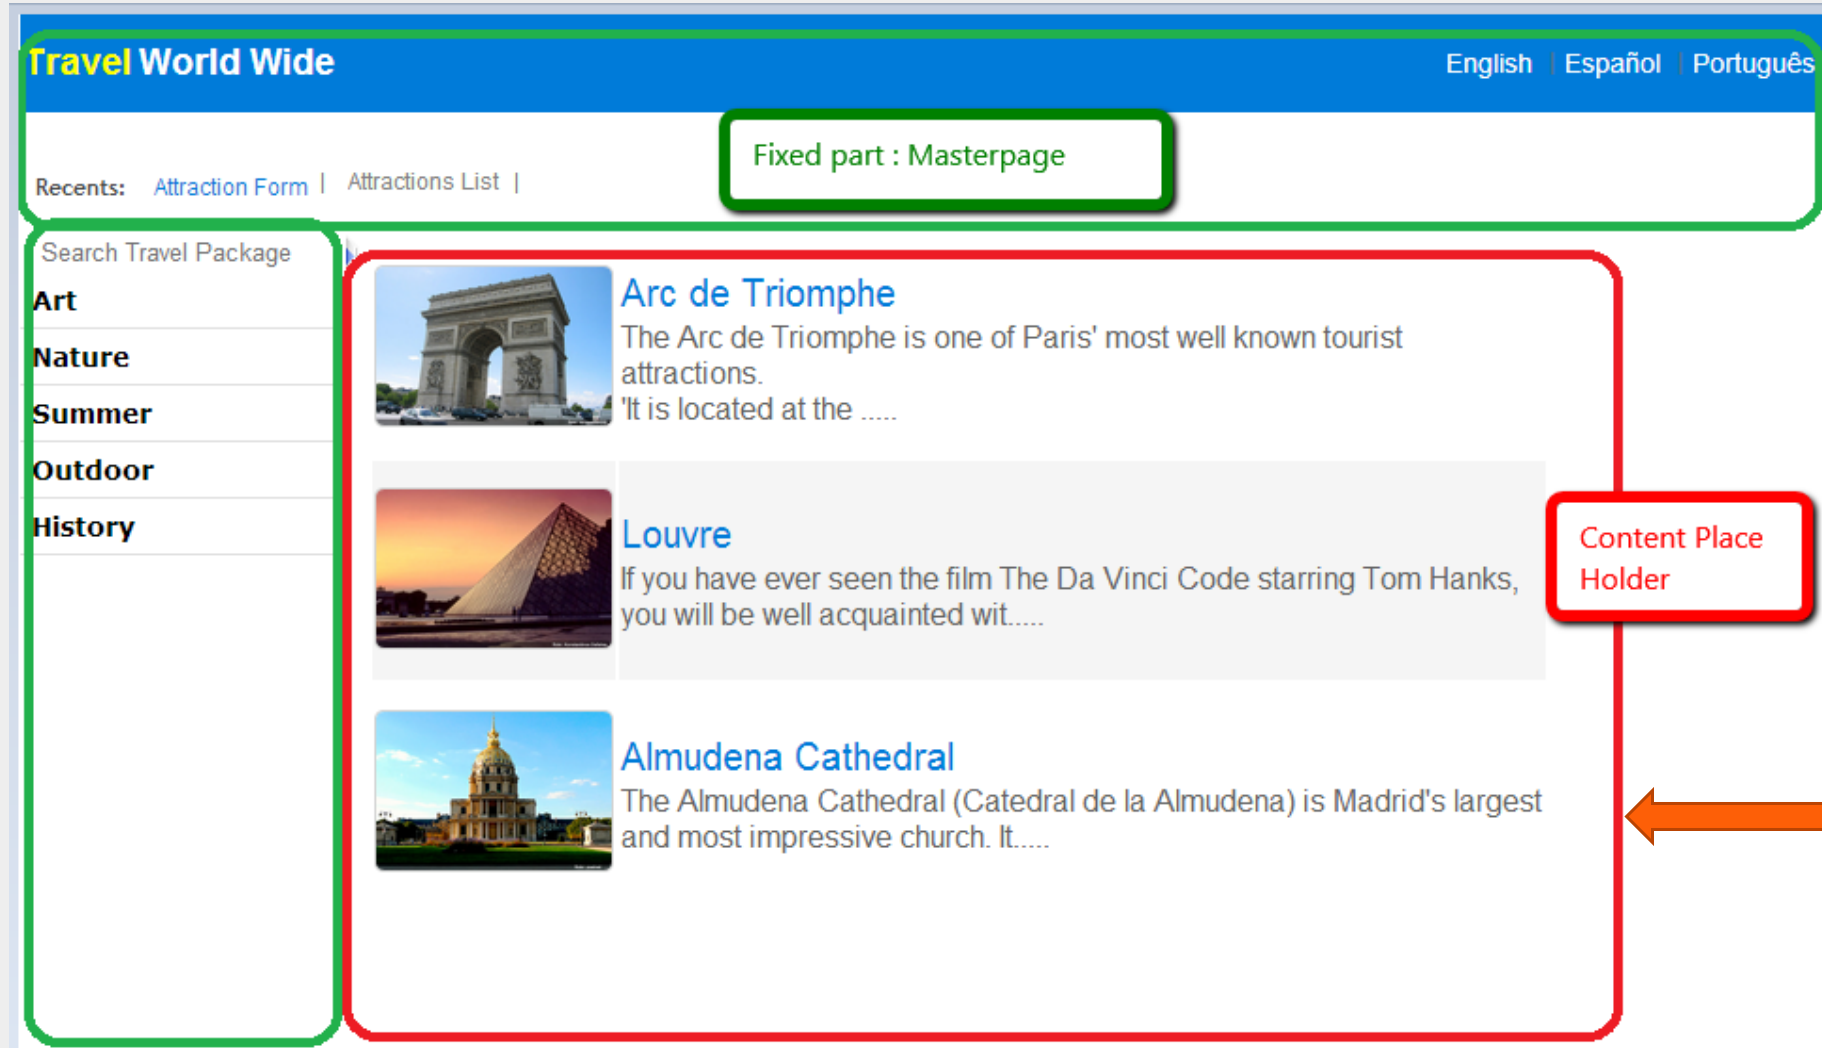

Targets All Platforms

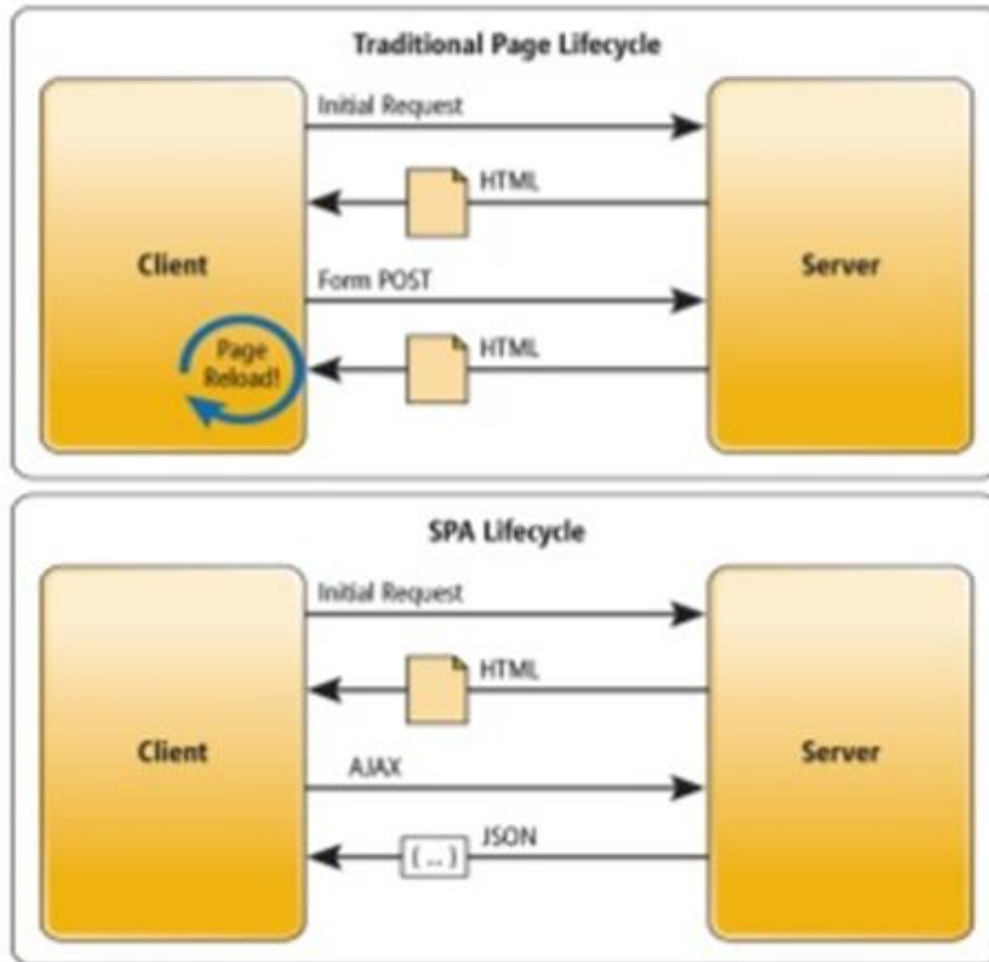

Speed & Performance

Single Page Applications

Source: <https://johnpapa.net/pageinspa/>

Traditional Applications vs Single Page Applications

▪ Traditional web page

- Request sent to server
- HTML Response from server
- Browser unloads previously loaded DOM
- Browser creates DOM for the response
- Browser renders DOM

▪ SPA

- Does not reload the page
- Load Resources (Html, CSS, JavaScript) on initial page load or as required generally in response to user action

Angular features

Smaller & Faster

Typescript

Component
Based

Annotations

Reusability

Unit Testable

Important concepts of the framework

Modules

Components

Templates

Directives

Routing

Observables

HTTP Calls

Services

Dependency
Injection

Angular is packaged as JavaScript Modules

- Angular is packaged in the **form of modules**.
 - @angular/core
 - @angular/forms
 - @angular/common/http
 - @angular/router
- These Angular modules are hosted on NPM.

Software required for the Training

- Node.js Installation
- Visual Studio Code (Editor)

Day wise Plan

- **Day 1**

- Overview of Angular framework
- Setting up an Angular Project
- Components and Modules

- **Day 2**

- Directives
- Data Binding
- Property and Event binding
- Dependency Injection

- **Day 3**

- @Input and @Output
- Observables
- HTTP Client

- **Day 4**

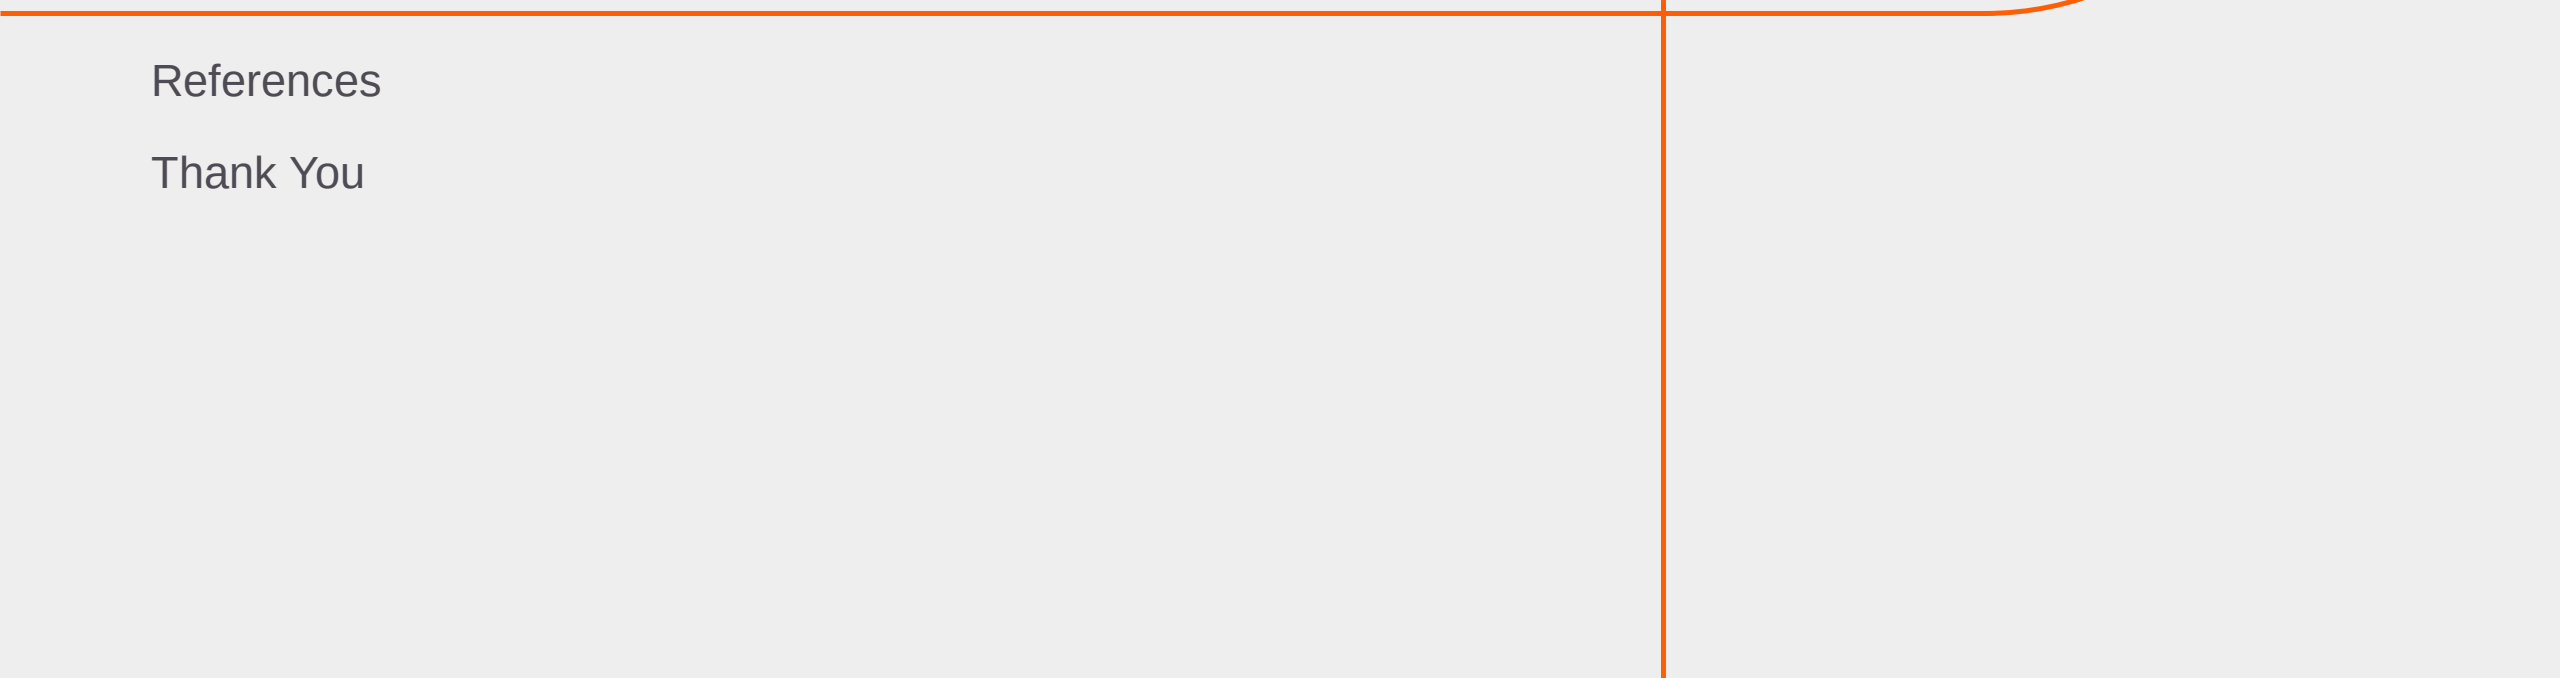

- Forms and Validations
- Routing
- Build, Test and Deploy

Summary: Session

With this we have come to an end of our session, where we discussed about

- Concept of Single Page Applications
- Component based Angular Applications
- Use of Typescript Language
- Key concepts in the Angular framework
