Subject in RxJS

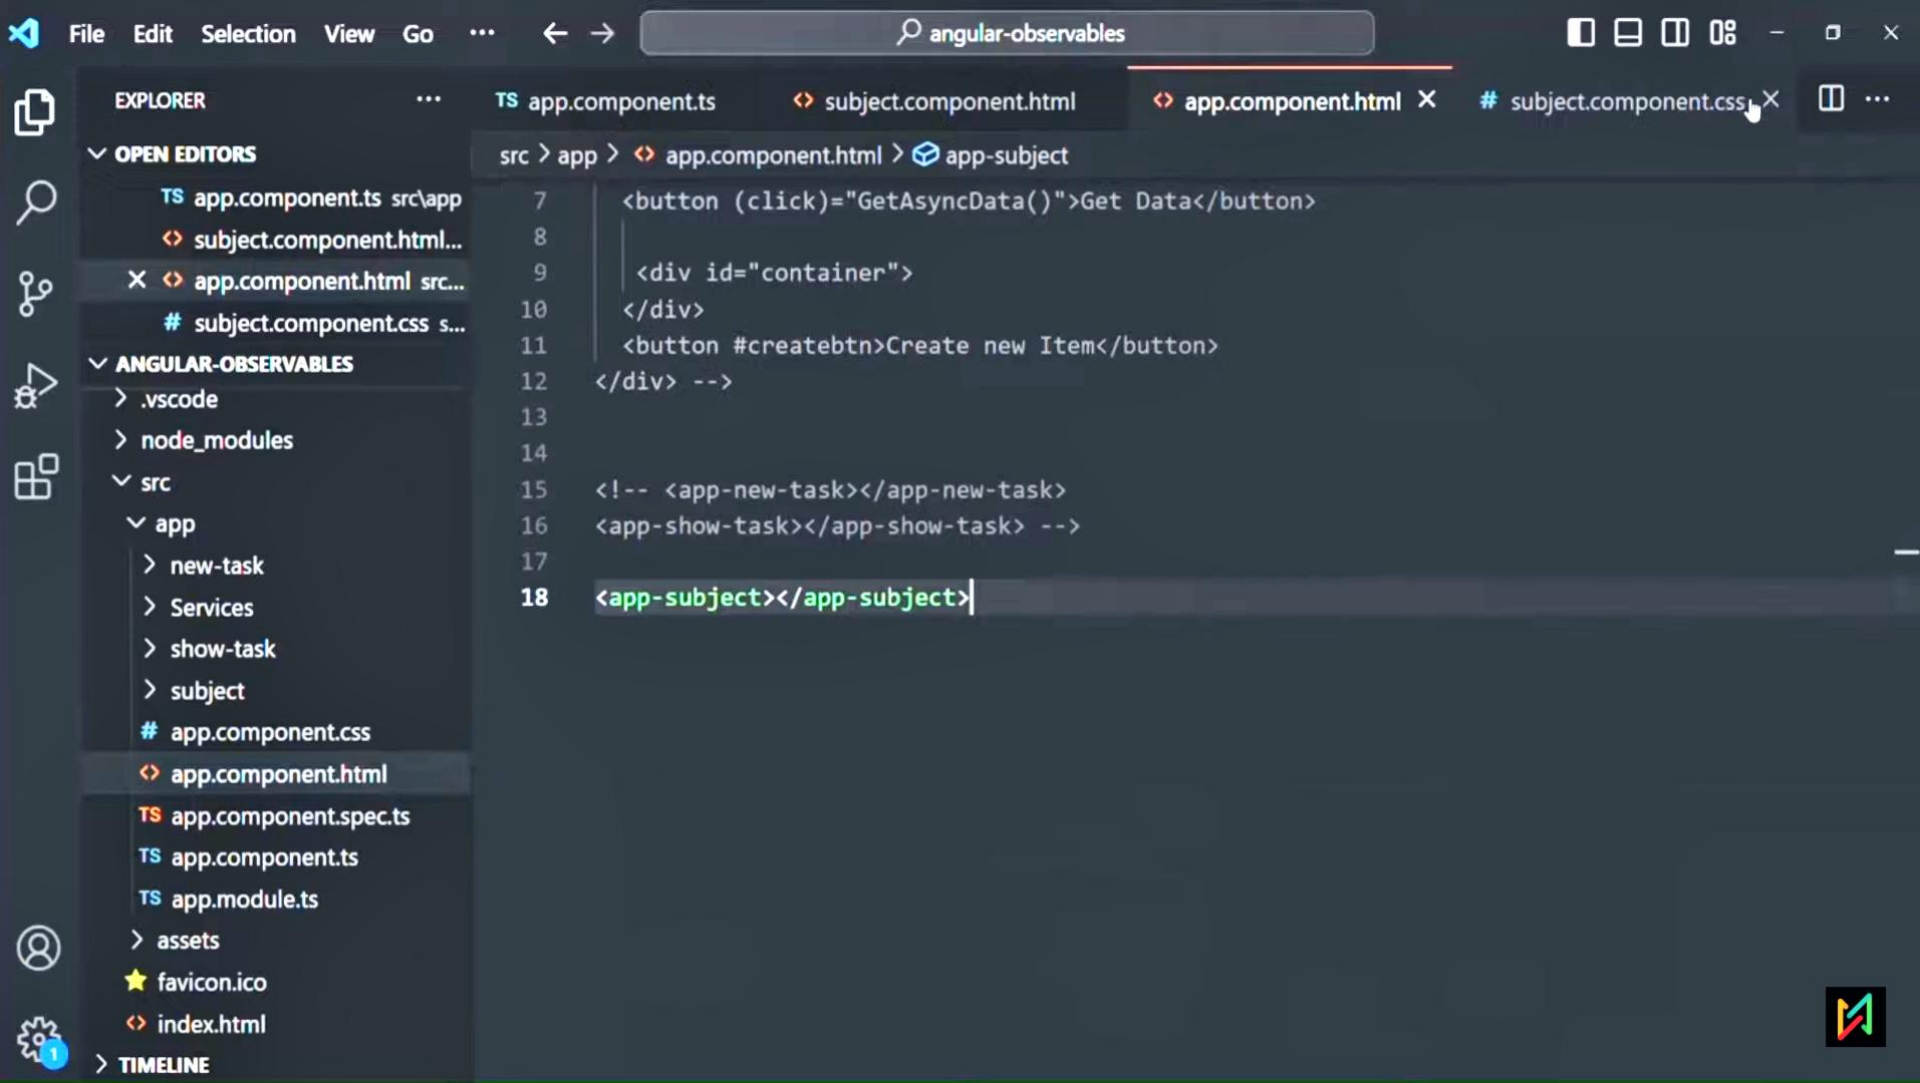

A subject is a special type of observable that allows values to be multicasted to many observers. Subjects are like EventEmitters.

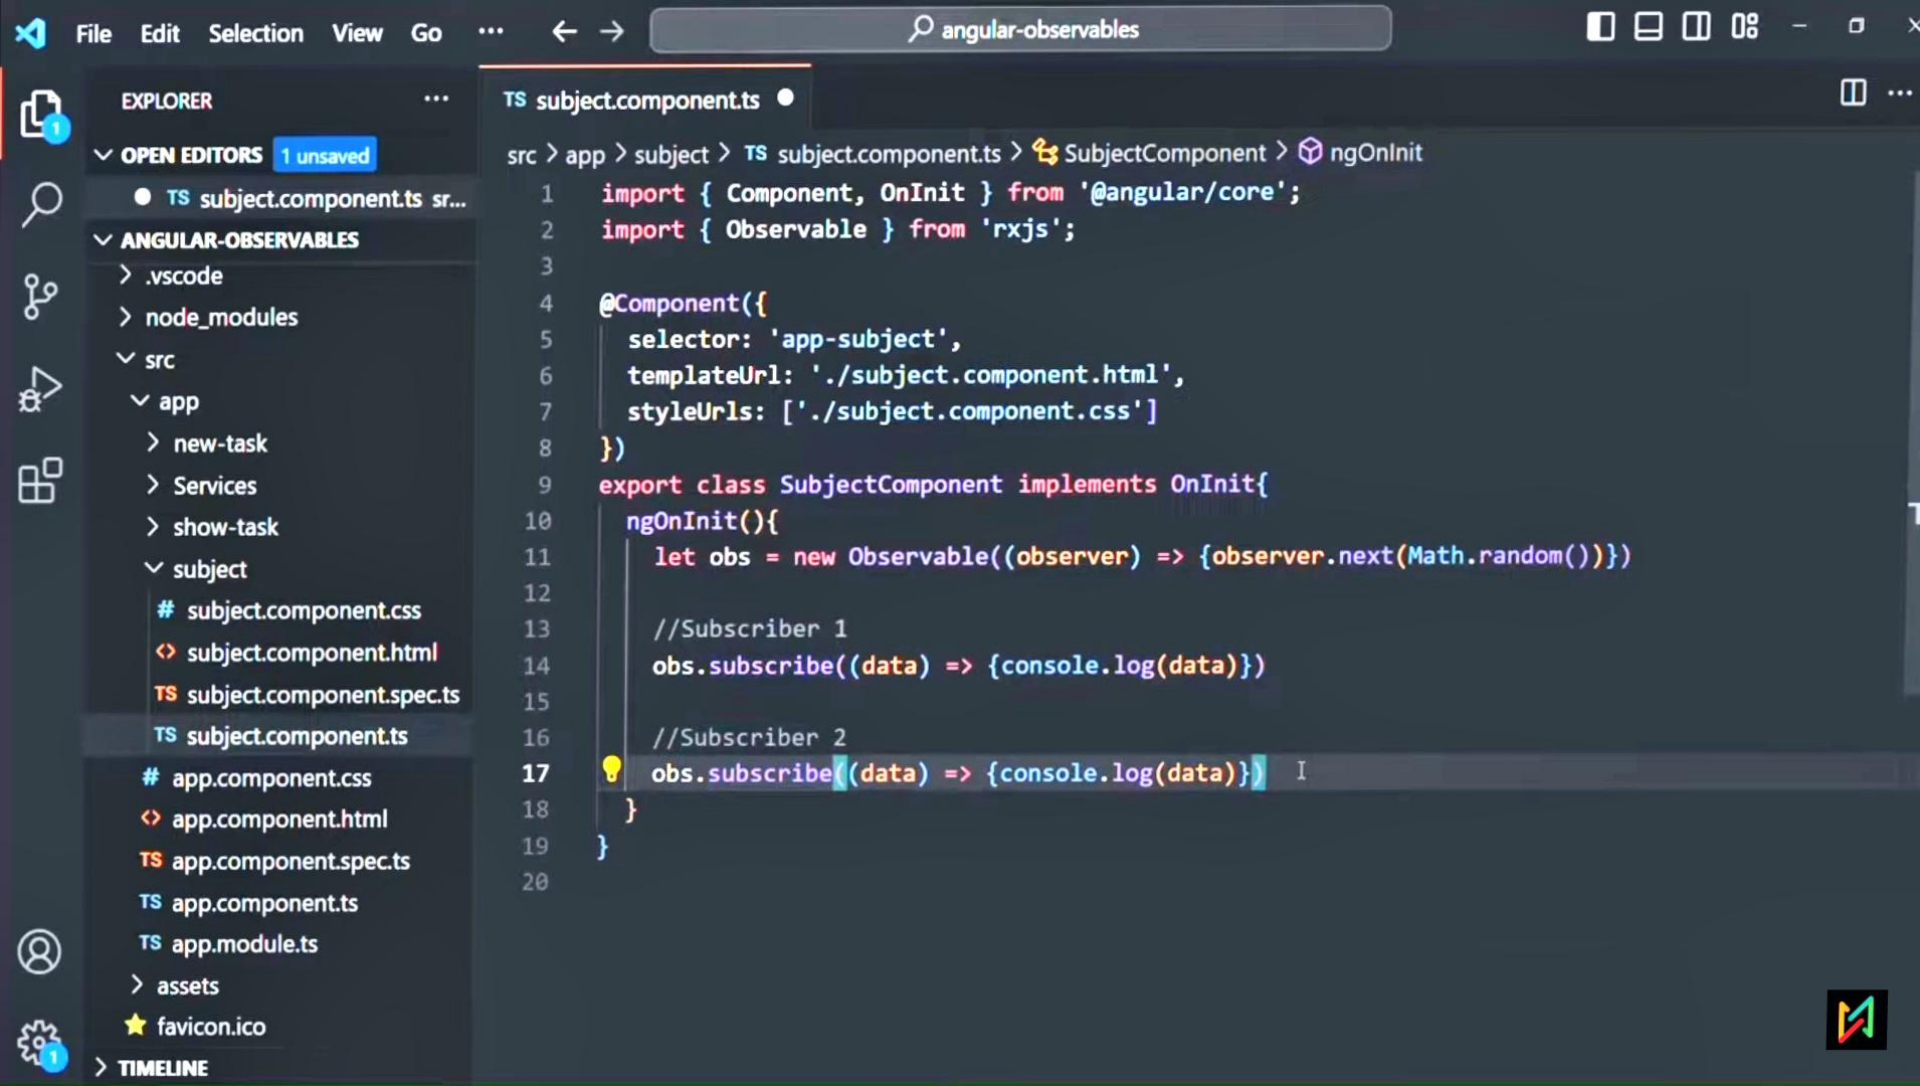

Observable vs Subject

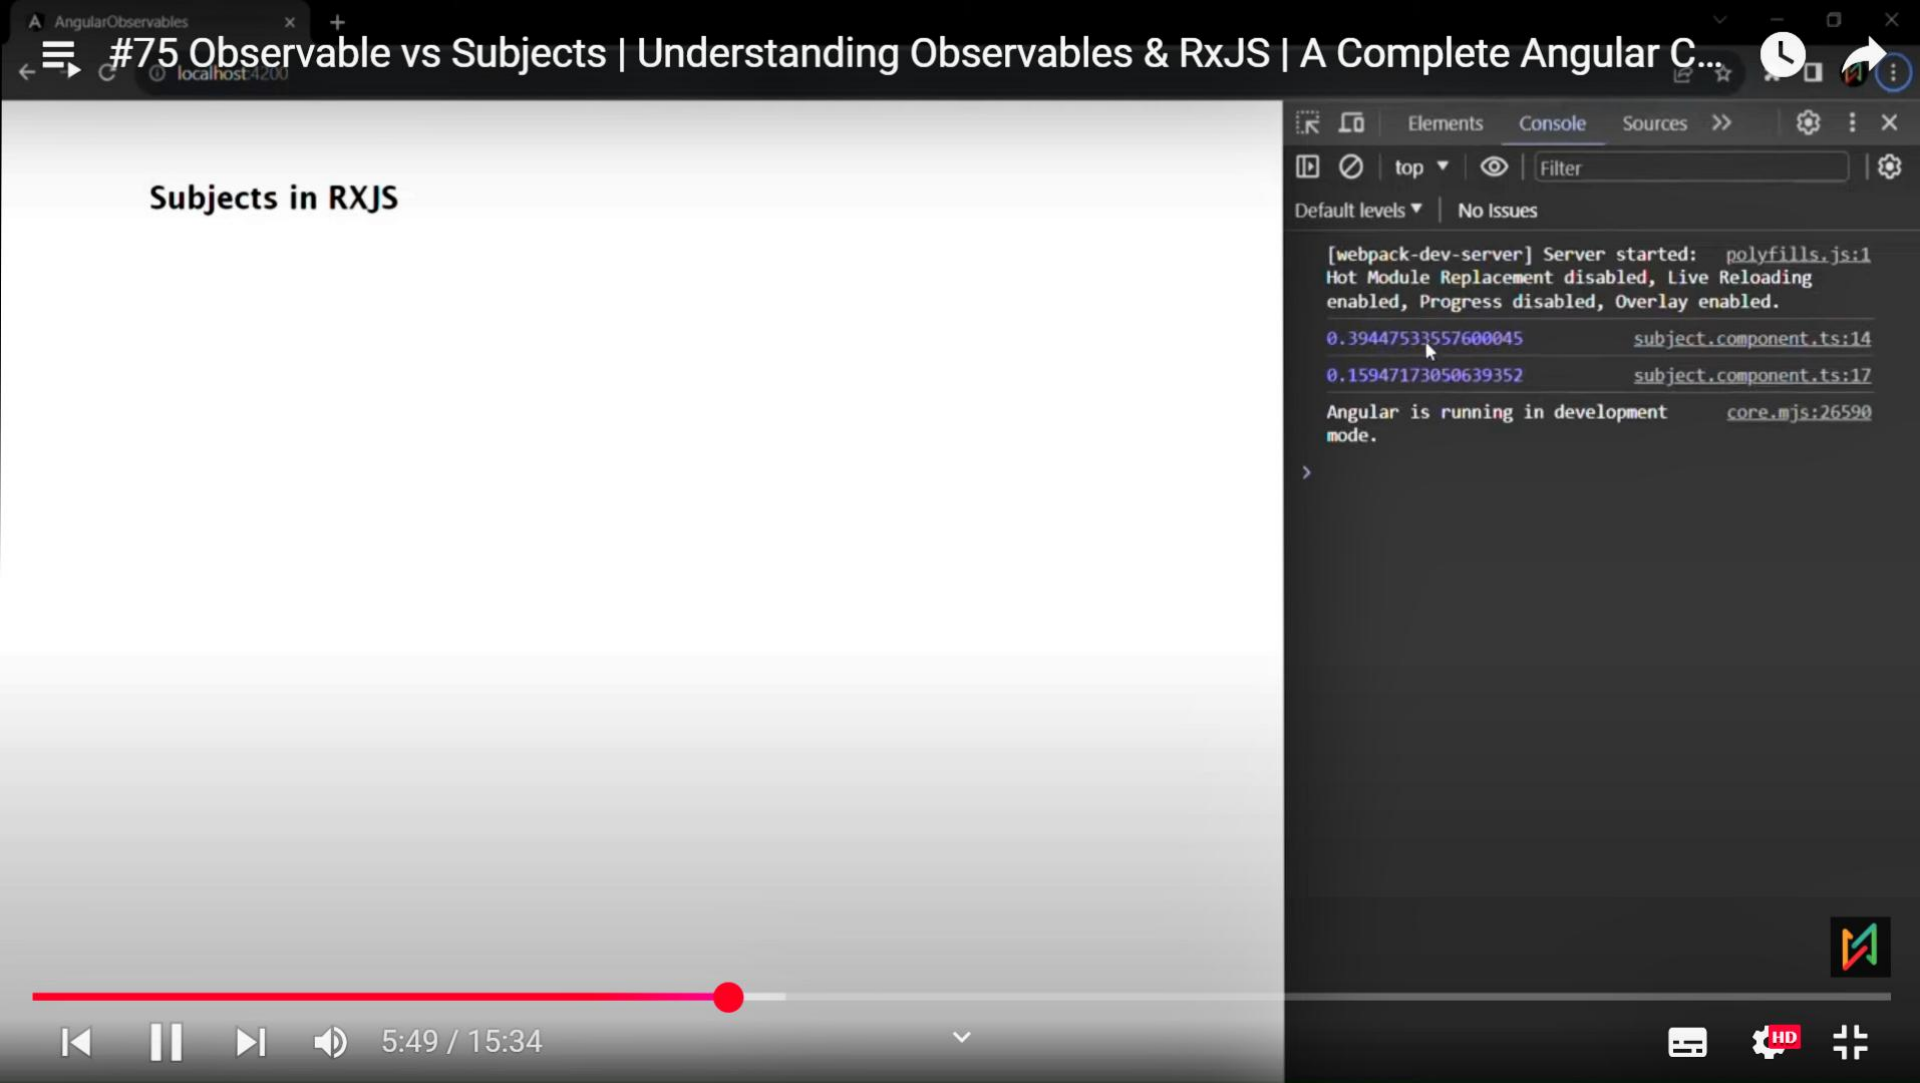

A subject is **multicast**. On the other hand an Observable is **unicast**.

The map Operator

The map operator is used to transform data emitted by a source observable in some way.

The `filter` Operator

The `filter` operator is used to filter data emitted by a source observable based on a given condition.

The map Operator

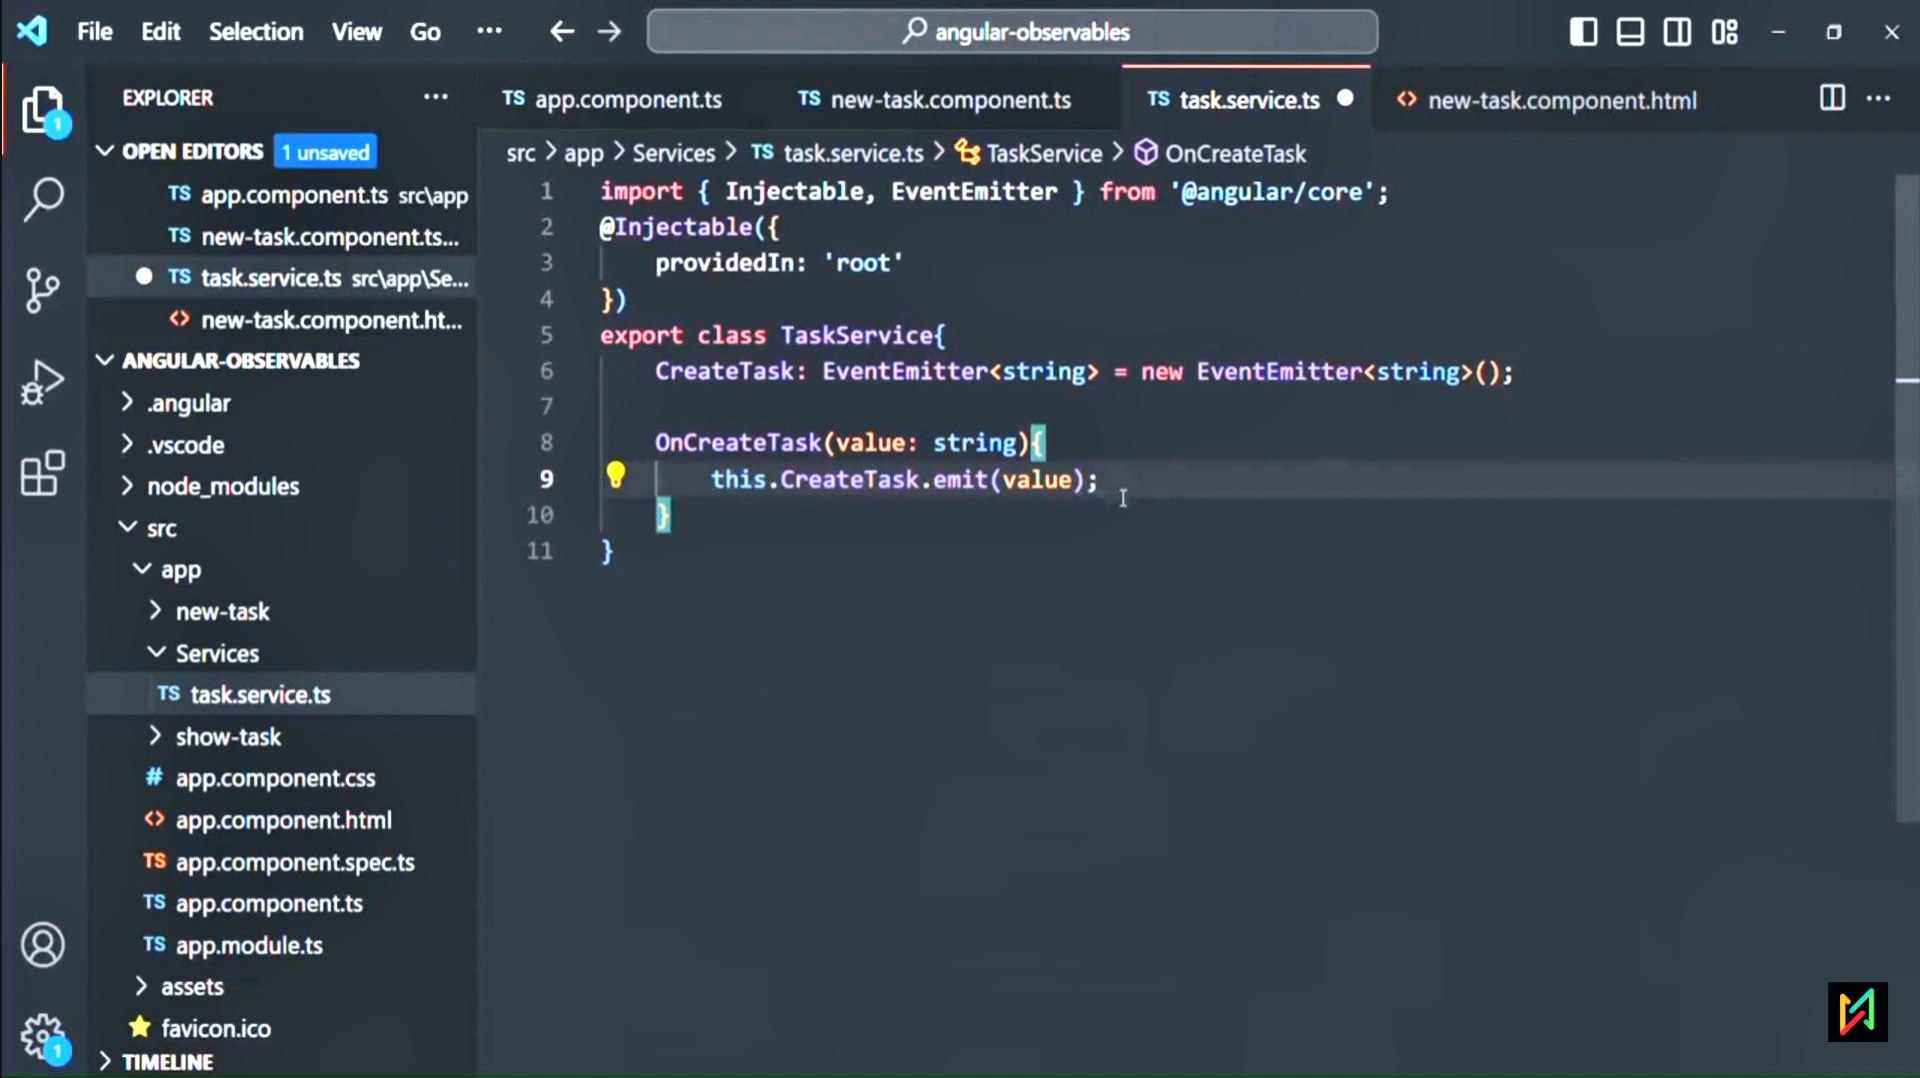

A subject is a special type of observable that allows values to be multicasted to many observers. Subjects are like EventEmitters.

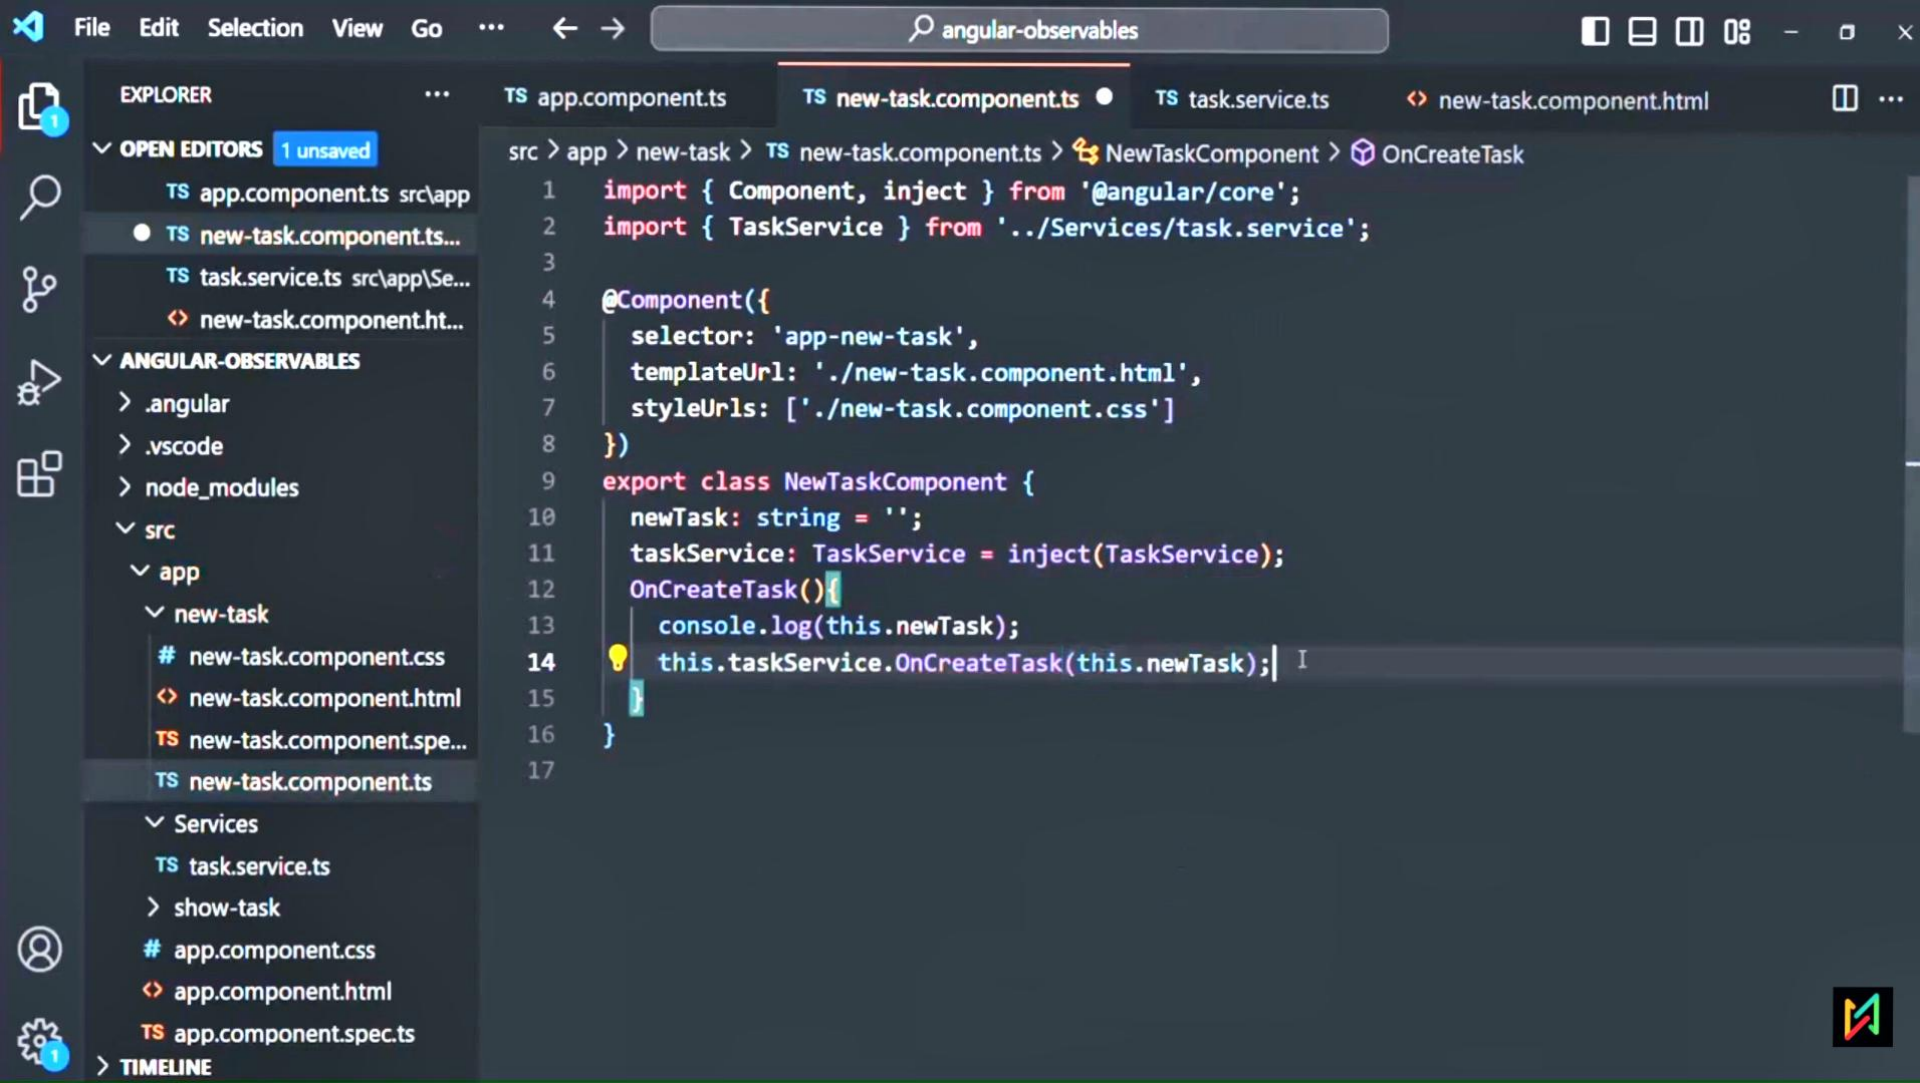

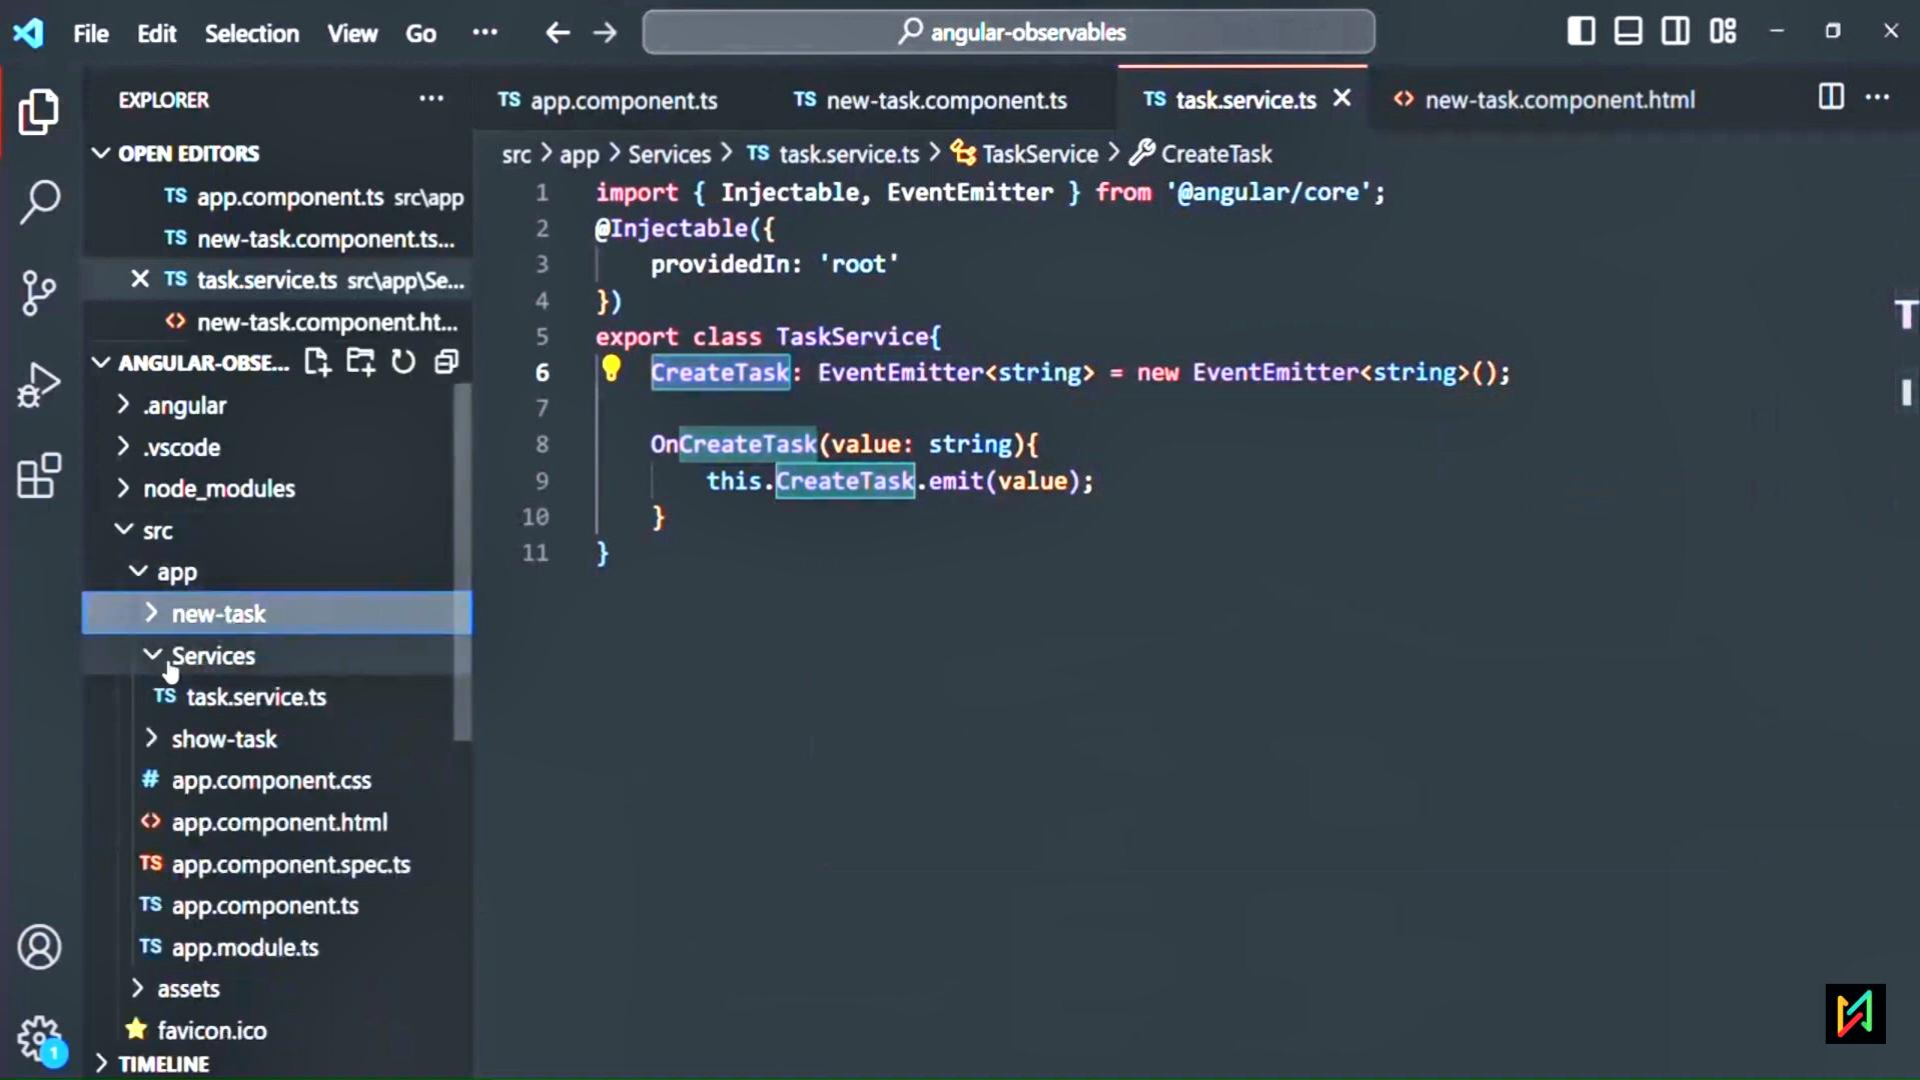

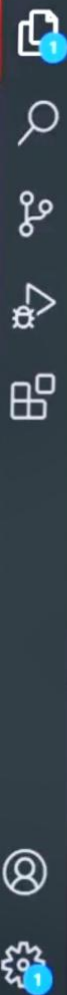

Behaviour Subject

A `BehaviourSubject` is a subject which can hold an initial value which it emits if no new value is emitted. A `BehaviourSubject` emits an initial value or last emitted value for a new subscriber.

Replay Subject

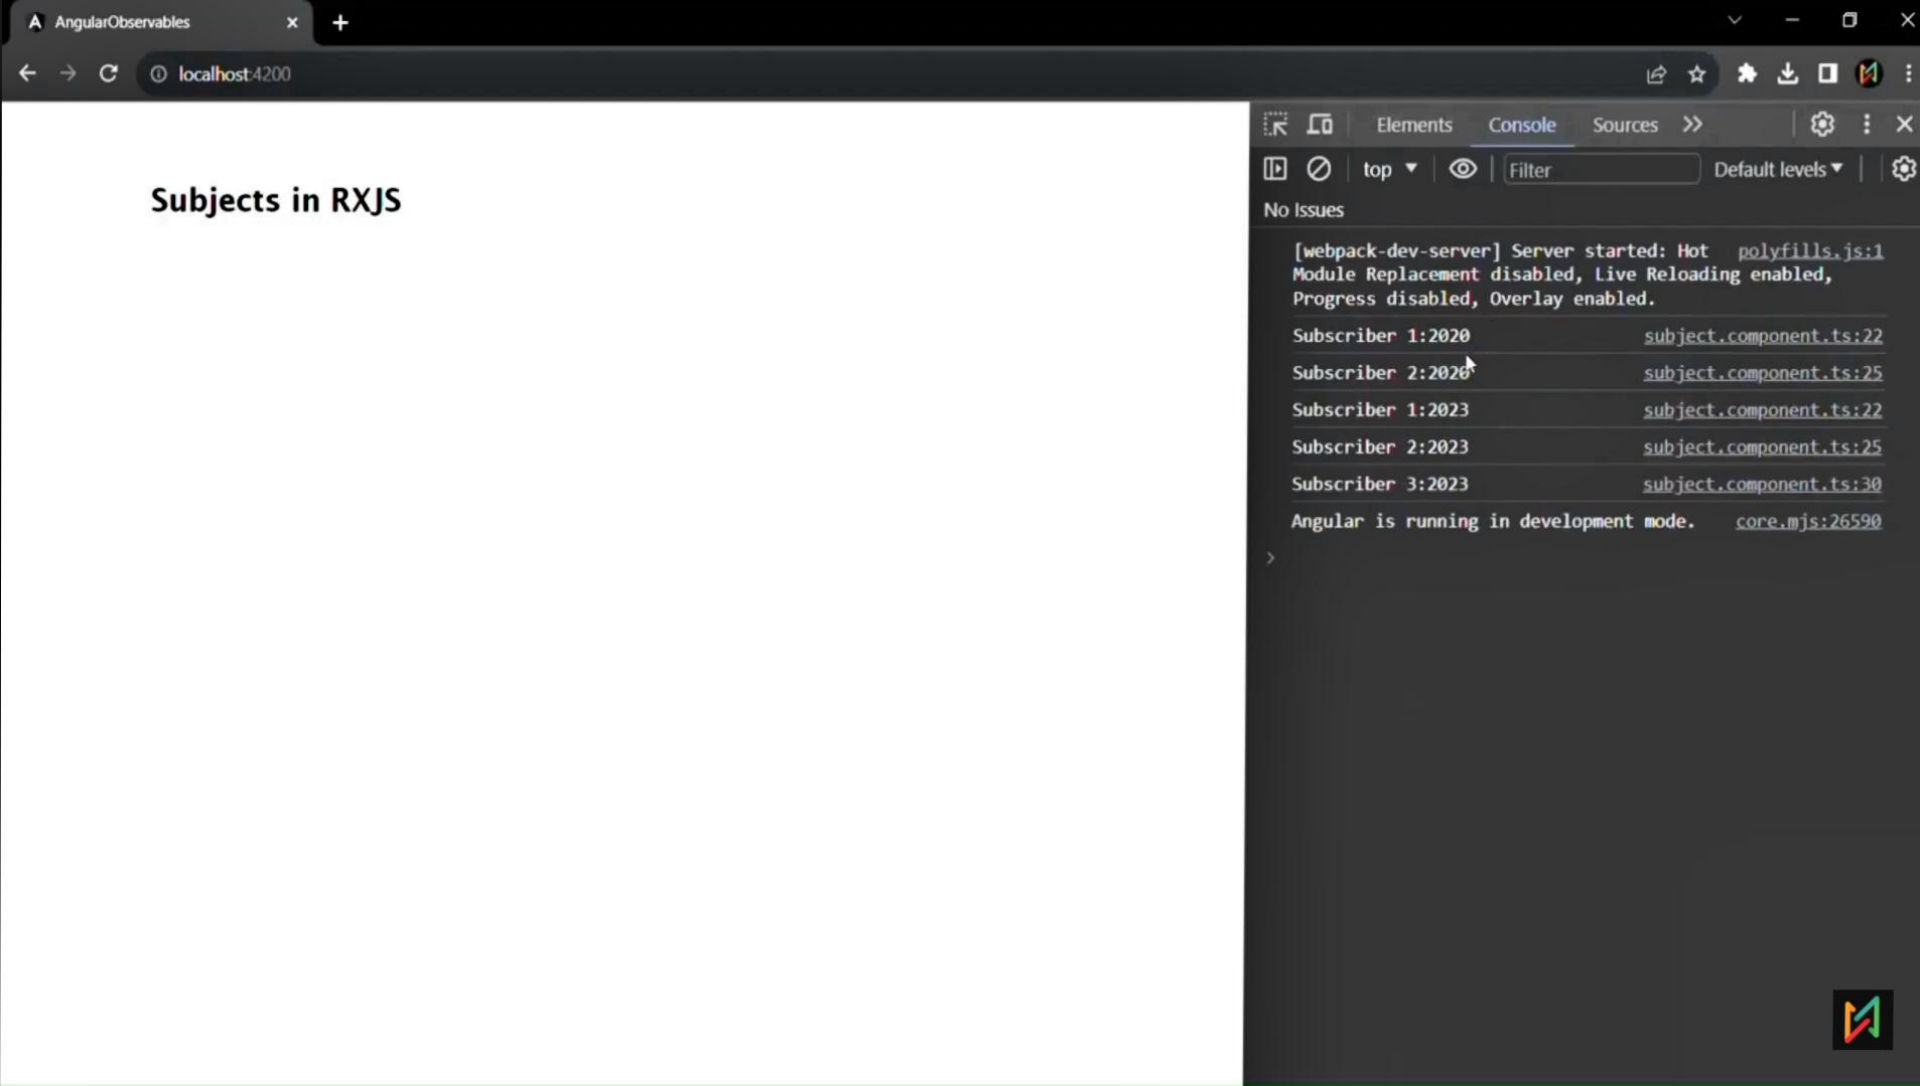

ReplaySubject replays old values to new subscribers when they first subscribe.

The ReplaySubject will store every value it emits in a buffer. It will emit them to the new subscribers in the order it received them. You can configure the buffer using the arguments **bufferSize** and **windowTime**

bufferSize: No of items that ReplaySubject will keep in its buffer. It defaults to infinity.

windowTime: The amount of time to keep the value in the buffer. Defaults to infinity.

subject.component.ts

```
31 //Subscriber 3
32 //subject.subscribe((data) => {console.log("Subscriber 3:" + data)})
33
34 //subject.next(2023);
35
36 //AJAX CALL
37 // const subject = new Subject();
38 // const data = ajax('https://randomuser.me/api/');
39
40 // subject.subscribe((res) => console.log(res));
41 // subject.subscribe((res) => console.log(res));
42 // subject.subscribe((res) => console.log(res));
43
44 // data.subscribe(subject);
45
46 //Async Subject
47 const asyncSubject = new AsyncSubject();
48
49 asyncSubject.next(100);
50 asyncSubject.next(200);
51 asyncSubject.next(300);
52 asyncSubject.complete();
53
54 asyncSubject.subscribe(data => console.log(`Subscriber 1: ${data}`));
55 }
```
